

TMB CARE Review Form 1

Record ID _____

PRE-MANUSCRIPT

1. Case Report Identification

(Year Last Name of First Author)

2. Reviewer Id

- EF
- SM
- NM
- KB
- Other

Reviewer ID - Other

3. What is the report code for the article?

(1 = Clear TMB & Paper 1, 2 = Round 2 Adverse Event, 3 = others TBD)

4. Title - Does the title contain the phrase "case report", "case study", "case series"?

- No
- Yes
- Not Sure

The title indicated the case is a

- case study
- case report
- case series

5. Title - Does the title contain the intervention?

- No
- Yes
- Not Sure

Title indicates the intervention as

6. Title - Does the title contain the condition of interest?

- No
- Yes
- Not Sure

Title indicates the condition as

7. Keywords - Does the case report include keywords?

- No
- Yes
- Not Sure

8. Abstract - Which of the following elements appear in the abstract?

- New knowledge offered by case report
- Client descriptors - demographics
- Client descriptors - medical history/diagnosis
- Client descriptors - findings from practitioner assessment
- Measures
- Treatment - approach: techniques used
- Treatment - application: number of sessions
- Treatment - application: length of sessions (e.g., 30-minutes)
- Treatment - application: frequency of sessions (e.g., 2/wk)
- Treatment - application: duration of sessions (e.g., 2 weeks)
- Practitioner descriptors - scope of practice
- Practitioner descriptors - experience level
- Results
- "Take-away" lesson
- Overstatements
- None
- N/A - No Abstract

INTRODUCTION

9. Manuscript Heading: Introduction

Indicate which of the following describes the Manuscript Heading for this aspect of the case report.

Manuscript Heading: Introduction - Other

- No clear manuscript heading identified
- Introduction
- Other:

(What manuscript heading was used for this section of the paper?)

10. Indicate which of the following elements were included in the paper's introduction?

- Literature synthesis/review: condition of focus
- Literature synthesis/review: technique/intervention and/or approach
- Type of case report
- Objective of the case report/treatment
- Contribution to the literature
- None
- N/A - No Introduction Section

11. Introduction - Indicate which type of case report/study is presented in the paper.

- prospective
- retrospective

12. Does the Introduction conclude with a clear and "smooth" transition to the "Methods" or "Case Presentation" (next) section of the paper?

- No
- Yes
- Unclear
- N/A

13. Indicate which items from other content areas were incorrectly reported in the Introduction section of this case report.

- None
- Case presentation material: assessment measures
- Case presentation material: client/patient descriptors
- Case presentation material: therapist descriptors
- Case presentation material: intervention description
- Results: baseline measures
- Results: outcome measures
- Results: other
- Discussion: results interpretation
- Discussion: other
- Other:

Other: Content incorrectly reported in the Introduction section of the paper.

CASE PRESENTATION (METHODS)

14. Manuscript Heading: Case Presentation
Indicate which of the following describes the Manuscript Heading for this aspect of the case report.

- No clear manuscript heading identified
- Methods
- Case Presentation
- Other:

Manuscript Heading: Case Presentation - Other

15. Informed Consent: Check the box if the case report included the following informed consent details.

- Not reported/mentioned/discussed in case report
- Consent to treat within scope of practice
- Consent to participate in case report/study within scope of practice
- Consent to publish the case report
- Consent to participate in formal case report/study in relation to a formal IRB
- Mentioned generally without specifics

Client Information

Manuscript Subheading: Client or Patient Information

16. Was a Client/Patient Information subheading (or other related) used in the case report to delineate this aspect of the paper?

- No
- Yes
- Other:

Manuscript Subheading: Client Info - Other

17. Client or Patient Information: Check the box if the case report included the following details about the client/patient:

- Demographics: Age
- Demographics: Gender
- Demographics: Race
- Demographics: Occupation/Activity
- Condition: Chief complaints/symptoms
- Condition: History - medical, family & psychosocial (includes past interventions and outcomes, lifestyle, and relevant comorbidities)
- Condition/Timeline: Timeline of important dates and times associated with the case
- Condition/Diagnosis: Describes how diagnosis was verified
- Clinical Findings/Assessment: Describes relevant findings from treating practitioner's physical assessment
- None
- N/A

Demographics: Age

Demographics: Gender

- Female
- Male

Demographics: Race

- White
- Black
- Asian
- Native American
- Hispanic
- Other

Client Race - Other

Demographics: Occupation/Activity

Condition: Chief complaints/symptoms of address

Timeline: Indicate how the timeline was conveyed in the article.

- Text Only
- Text and ...
- Table
- Figure

Diagnosis: Indicate how the diagnosis was verified.

18. Client Information Notes: Specifically to report client details for case series.

Measures

19. Was a Measures subheading (or other related) used in the case report to delineate this aspect of the paper?

- No
- Yes
- Other:

Measures Subheading: Other

20. Assessment Measures: Check the box if the case report included the following details regarding the assessment measures.

- None
- Description of what was measured - singular
- Description of what was measured - multiple
- Description of how outcome was measured - singular (assessment)
- Description of how outcomes were measured - multiple (assessments)
- Standard assessment measures used
- Contrived assessment measures used
- Measurement psychometrics presented
- N/A

21. What was/were the primary outcome(s) of interest in the case?

22. What was/were the other outcome(s) of interest in the case?

Indicate the standardized measures (or method of measurement) used in the case.

(ex) SF-36, VAS, dynamometer, etc)

Indicate the contrived measures (or method of measurement) used in the case.

(ex) pen test (how long a pen is held between top lip and nose))

Indicate which psychometric properties were included in the measurement descriptions.

- Usage
- Level of Measurement
- Reliability: Test-Retest Reliability
- Reliability: Internal Consistency
- Reliability: Intra-rater
- Reliability: Inter-rater
- Validity
- Responsiveness: Internal
- Responsiveness: External
- General Reliability Statement
- General Validity Statement

23. Were pertinent details needed to replicate measurement collection procedures included in the case report?

- No
- Yes
- Unsure
- N/A

Practitioner Descriptors

24. Was a Practitioner Descriptors subheading (or other related) used in the case report to delineate this aspect of the paper?

- No
- Yes
- Other

Practitioner Descriptors: Other

25. Practitioner Descriptors: Check the box if the case report included the following practitioner descriptors.

- Scope of practice
- Practice setting
- Experience level
- Training
- Credentialing
- None
- N/A

Practitioner Descriptor: Scope of practice

Practitioner Descriptor: Practice setting

Practitioner Descriptor: Experience level _____

Practitioner Descriptor: Training _____

Practitioner Descriptor: Credentialing _____

Intervention

Manuscript Subheading: Therapeutic Intervention

- No
 Yes
 Other

26. Was a Therapeutic Intervention subheading (or other related) used in the case report to delineate this aspect of the paper?

Manuscript Subheading: Therapeutic Intervention - Other _____

27. Therapeutic Intervention: Check the box if the case report included the following intervention details.

- Intervention Descriptor: Conceptual approach
 Intervention Descriptor: Techniques
 Administration: Total number of treatments
 Administration: Length of treatments (e.g., 30 minutes, 60 minutes, etc.)
 Administration: Frequency of treatments (e.g., weekly, twice per week, etc.)
 Administration: Course of treatment duration (e.g., 3 weeks, 2 months, etc.)
 Administration: Rational for treatment plan administration
 Intervention Descriptor: Details regarding "geographic" areas addressed
 Intervention Descriptor: Details regarding time spent in different areas
 Intervention Descriptor: Details regarding time spent applying different techniques
 Intervention Descriptor: Details regarding pressure application
 Administration: Changes made to the intervention
 Administration: Rational for changes made to the intervention
 Intervention Descriptor: Recommendations or referrals to other providers
 Intervention Descriptor: Self-care recommendations/Take-home work given
 None
 N/A

Therapeutic Intervention: Conceptual Approach

(ex) Barnes Method, Traditional Chinese Medicine)

Therapeutic Intervention: Techniques Used

(ex) trigger point therapy, compression)

Therapeutic Intervention: Total Number of Treatments

Therapeutic Intervention: Length of Treatments

(how long treatments lasted)

Therapeutic Intervention: Frequency of Treatments

(how often treatments occurred (e.g., 2/week))

Therapeutic Intervention: Course of Treatment Duration

(total timeframe for treatments (e.g., 5 weeks))

28. Intervention Descriptors Reporting: Check the boxes that indicate ways in which treatment details of body regions, timing, pacing, pressure, etc. were reported.

- Text only
 Text and ...
 Table
 Figure
 No such descriptors included

29. Based on the details reported in the case report, could the intervention applied be reasonably replicated?

- No
 Yes
 Unsure
 N/A - no details reported

Recommendations/Referrals: Indicate which recommendations and/or referral to other providers were reported in the case report.

Selfcare Recommendations/"Homework": Indicate which selfcare recommendations and/or "homework" from the practitioner were reported in the case report for the client/patient.

30. Which items from other content areas were incorrectly reported in the Case Presentation section of this case report?

- None
 Introduction material (e.g., premise, context, etc.)
 Results: Baseline measures
 Results: Outcome measures
 Results: other
 Discussion: results interpretation
 Discussion: other

Manuscript Heading: Results

31. Indicate which of the following describes the Manuscript Heading for this aspect of the case report.

- No clear manuscript heading identified
 N/A - No corresponding section included
 Results
 Other:

Manuscript Heading: Other

32. Results: Check the box if the following elements were included in the results:

- Baseline for primary outcome measure(s)
 Baseline for other outcome measure(s)
 Baseline for all introduced outcome measures
 Baseline for measures NOT introduced
 Outcomes for primary outcome measure(s)
 Outcomes for all introduced outcome measures
 Outcomes for measures NOT introduced
 Measures reported in the same order as previously introduced
 Results presented in table(s)
 Results presented in figure(s)
 Describe how the patient adhered to and tolerated the treatment plan/intervention
 Describe how patient adhered to referrals from TMB practitioner
 Describe how client/patient adhered to self-care and/or homework instructions from TMB practitioner
 Adverse Events: Stated no adverse events occurred
 Adverse Events: Reported and described UNrelated adverse events
 Adverse Events: Reported and described RELATED adverse events
 N/A - no results reported

What non-introduced measures reporting occurred in the results?

(What was measured or the tool used.)

What related adverse event(s) was reported?

33. Which items from other content areas were incorrectly reported in the results section of this case report?

-
- None
 - Introduction material (e.g., premise, context, etc.)
 - Case presentation material: assessment measures
 - Case presentation material: client/patient descriptors
 - Case presentation material: therapist descriptors
 - Case presentation material: intervention description
 - Discussion: results interpretation
 - Discussion: other

Incorrect Reporting: Discussion - other:

34. Which of the following best describes the "nature" of the outcomes reported from the case report?

-
- Reported benefits from TMB treatment
 - Reported mixed (some positive, some negative) benefit from TMB treatment
 - Reported no change from TMB treatment
 - Reported negative results from TMB treatment
 - Reported harm from TMB treatment
 - Unclear
 - N/A

What harm was reported?

DISCUSSION

Manuscript Heading: Discussion

35. Indicate which of the following describes the Manuscript Heading for this aspect of the case report.

- No clear manuscript heading identified
- N/A - No corresponding section included
- Discussion
- Other:

Manuscript Heading: Discussion - other

36. Discussion: Check the box if the following elements were included in the discussion section of the case report:

-
- Clear acknowledgment of inherent limitations for case reports
 - Reported the strengths of the intervention provided
 - Reported the limitations of the intervention provided
 - Compare and integrate case findings with the relevant health care literature
 - Patient Perspective: included comments that the client/patient shared regarding their experience with the intervention)
 - Suggest a rationale for why the outcomes observed occurred
 - Provide "take-away" lessons related to the case report
 - Discuss case implications for TMB practice
 - Discuss case implications for TMB education
 - Discuss case implications for TMB research
 - Overstatements: Results
 - Overstatements: Implications

OTHER COLLECTED CASE REPORT FEATURES

37. What kind of paper?

- Case Report
 Case Study
 Case Series

How many cases are in the case series?

Intervention Applicant

38. Who applied the intervention highlighted in the case report?

- Unclear
 TMB practitioner (massage therapist)
 TMB practitioner (massage therapist) - student
 Other related practitioner (PT, OT, nurse, etc.)
 Other related practitioner (PT, OT, nurse, etc.) - student
 Non-related practitioner (MD, cosmetologist, social worker)
 Other:

Which related practitioner provided the treatment?

 (OT, PT, Chiro)

Intervention Application: Other

Publication Year

39. In which year was the case report/study published?

Case Report Author: Number

- Single Author
 Multiple Authors

40. Which best describes the authorship of the case report/study?

Number of authors on the case report.

Case Report Author: Solo

Which descriptors are applicable to the one author of the publication?

- Unclear
 Treatment provider
 TMB practitioner
 Other related practitioner (PT, OT, nurse, etc.)
 Non-related (MD, cosmetologist, social worker)
 Non practitioner (e.g., parent, family member)
 Academically Affiliated - non-PhD
 Academically Affiliated - PhD
 Non-Academic PhD
 Other:

Solo Authors: Descriptors - Other

Case Report Author: Multiple

Which descriptors are applicable to the one author of the publication?

- Unclear
 Treatment provider
 TMB practitioner
 Other related practitioner (PT, OT, nurse, etc.)
 Non-related (MD, cosmetologist, social worker)
 Non practitioner (e.g., parent, family member)
 Academically Affiliated - non-PhD
 Academically Affiliated - PhD
 Non-Academic PhD
 Other:

Multiple Authors: Descriptors - Other

Journal/Publication Name

41. What is the name of the journal in which the case report/study is published?

- IJTMB
- Movement & Bodywork Therapies
- Other

What is the name of the journal in which the case report/study is published?

Journal/Publication Accessibility

42. Is the journal in which the case report/study is published open access?

- Yes
- No

Journal/Publication: CAM Scope

43. Is the journal in which the case report/study is published clearly CAM related?

- Yes
- No

Journal/Publication: Audience

44. Which checkboxe(s) indicate the main audience of the journal in which the case report is published?

- CAM Practitioners
- TMB Practitioners
- Physical Therapists
- Nurses
- Medical Doctors
- Primary Care Providers
- Rehabilitation
- Sports Medicine/Athletic Training
- Occupational Therapists
- Community Populations
- Other:

Journal/Publication: Audience - Other

45. General Reviewer Comments/Notes
